Curb Mounted/Replacement Tops

Supreme Skylights make it easy to replace your existing top to increase thermal performance while making your skylight look new. We can manufacture almost any size top to fit your existing or new site built curb.

STANDARD FEATURES

* Clear Tempered Low E Argon Filled Glass
* Integrated Hinge System With Built-In Water Diverter
* Extruded And Welded Aluminum Top
* Powder Coated Finish (Custom Colors Available)
* Thermal Break PVC Frame With Condensation Gutter
* Santoprene Gasket For Weathertight Seal

OPTIONS

* Fixed Or Vented W/Hardware
* Custom Sizes And Shapes
* Glazing: Laminated/Bronze/Obscure/Poly-Carbonate

INSTALLS IN 5 EASY STEPS:

1. Remove the existing skylight top
2. Install the water diverting hinge bar
3. Set the Supreme top on new or existing curb
4. Raise the top 45 degrees to engage the hinge
5. Compress the gasket and install screws to secure as a fixed top or connect sash pin to operator for venting skylights

Accessories

From our innovative solar powered motor with remote to light filtering or black out shades, we offer many choices to customize your skylight installation.

Skylight Pole

This pole easily extends from 6' to 10' to allow manual operation of vented skylights.

Motorized Kit

Factory installed motor allows a skylight to be operated by either wall switch or optional handheld remote. Includes rain sensor. Available for skylights 20" wide and larger.
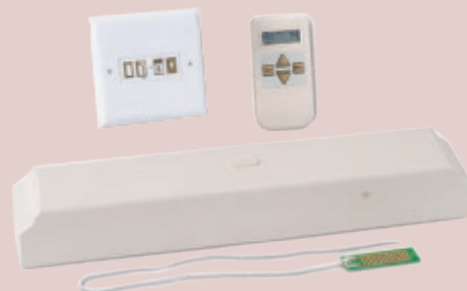

Pleated Shades

Our shades are available in manual or motorized in either light filtering or black out cellular pleated fabric. Motorized shades are available with a rechargeable battery or solar powered option, controlled by a hand held remote.

Solar motor with remote

The Supreme solar smart motor is a solar charged, remote operated, chain driven skylight opener system. It includes a rain sensor and can be integrated into many home automation systems. No wiring is required so you'll save on the cost of installation.
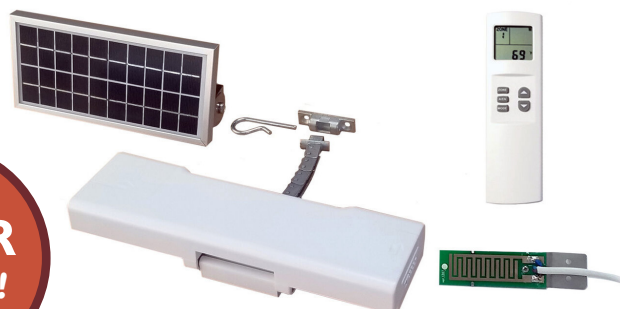

2-YEAR
Warranty!
